WHITEPAPER

PROJECT

METASHARK

Introduction

Welcome to the world of Metashark. A shattered land of beauty and wonder. Travel the vast and varied landscape hunting dangerous beasts, then capture them to battle in the Metaocean or trade via the exchange.

Prior to launch of the game, \$MTS holders may choose to stake \$MTS to access the liquidity mining program (a type of ‘yield farming’ that has become popular with DeFi protocols where the founding teams seek to decentralise the governance of the protocol).

EAT.
CRYPTO

The purpose of the liquidity mining program is to distribute \$MTS from METASHARK to early METASHARK community members to: 1) achieve a distributed holding of \$MTS tokens across more of the METASHARK community, 2) incentivise new people to participate in the METASHARK community, and 3) to enable a more liquid and transparent market for the trading of \$MTS. The greater the size of the Illuvium community, the greater the prospects of decentralised governance as well as a self-regulating community that discourages bad actors and manipulation of governance and the game. Once the game is launched, users can stake \$MTS as a signal of belief and support in the game and its governance model and receive access to governance and distributions from in-game fees.

WHY METAVERSE ?

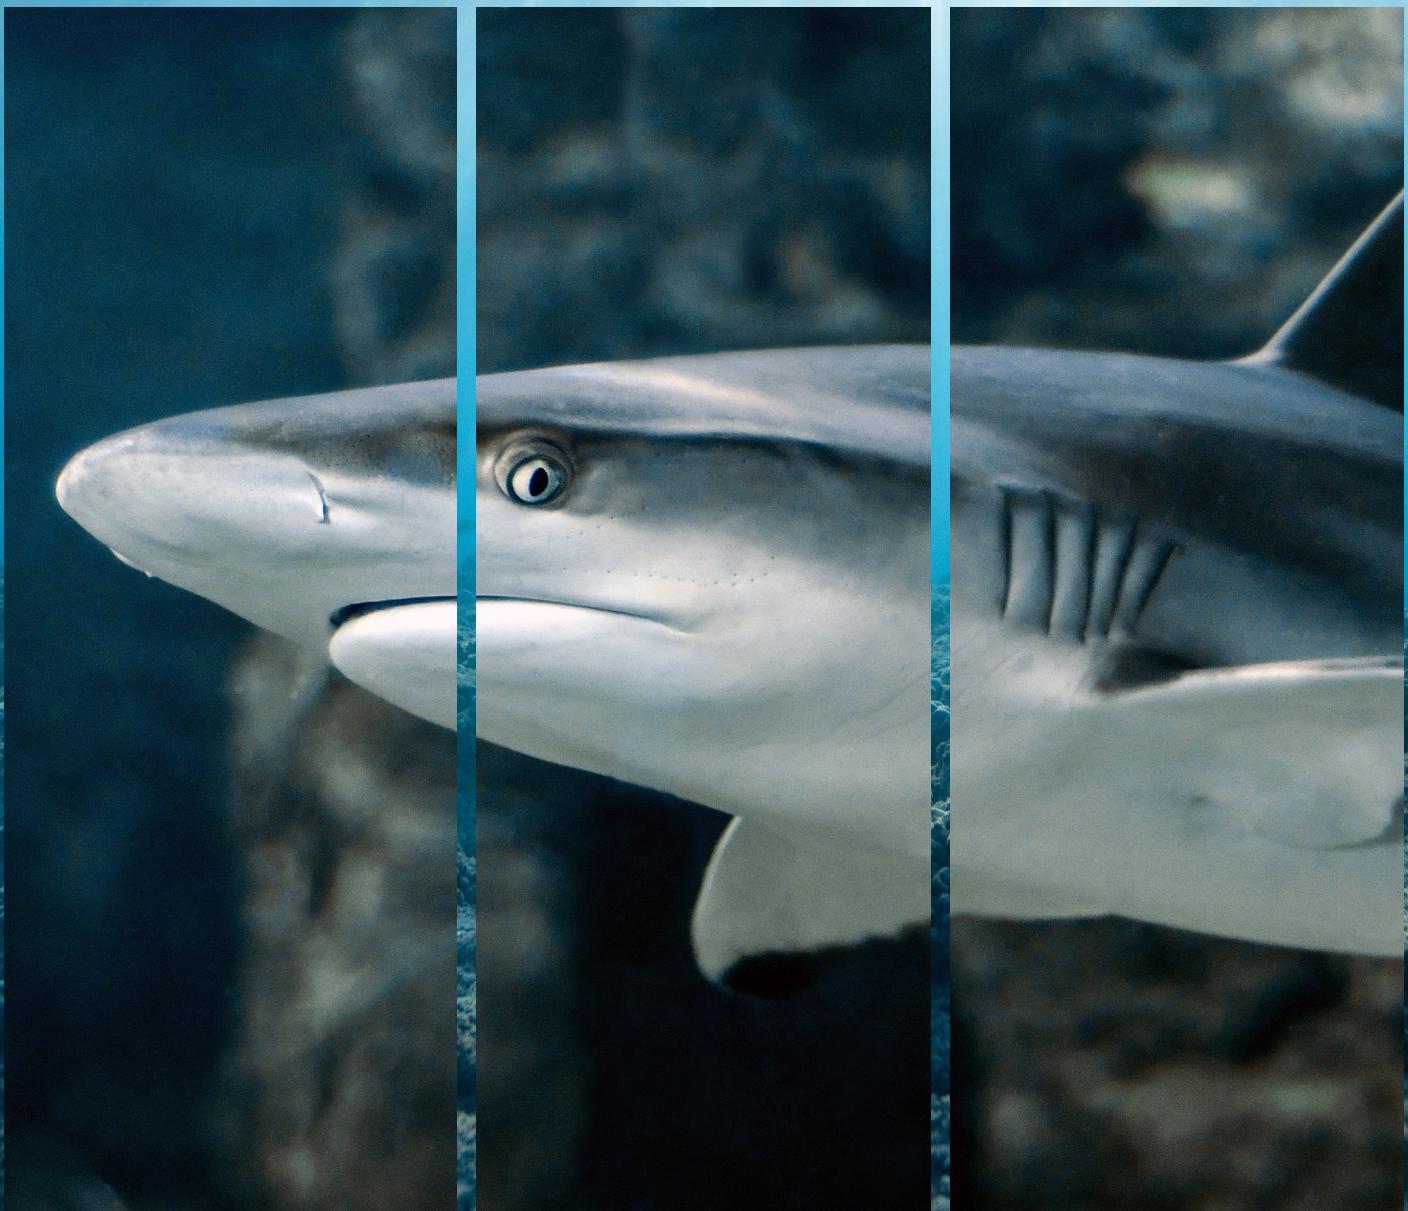

The primary goal of the project is to create a fully decentralised game that can run autonomously. Over the last 18 months, and particularly in the last six, DeFi apps have seen impressive growth and rapid development. There are hundreds of metaverse projects gaining traction today — from trading, lending, and wallet interfaces, to assets and communities representing over 15B \$USD in value. DeFi allows us to leverage this exciting growth to bootstrap a solvent platform that can hit the ground running for the increasing market interest in metaverse projects.

METASHARK

NOVELTY PROJECTS

We are already starting to see a shift away from “novelty projects” that don’t add tangible value because ultimately they are unsustainable. We strongly believe a decentralized gaming economy provides the best fusion between crypto/blockchain/DAO /metaverse enthusiasts and gamers looking for open access devoid of corporate interference.

SHARK

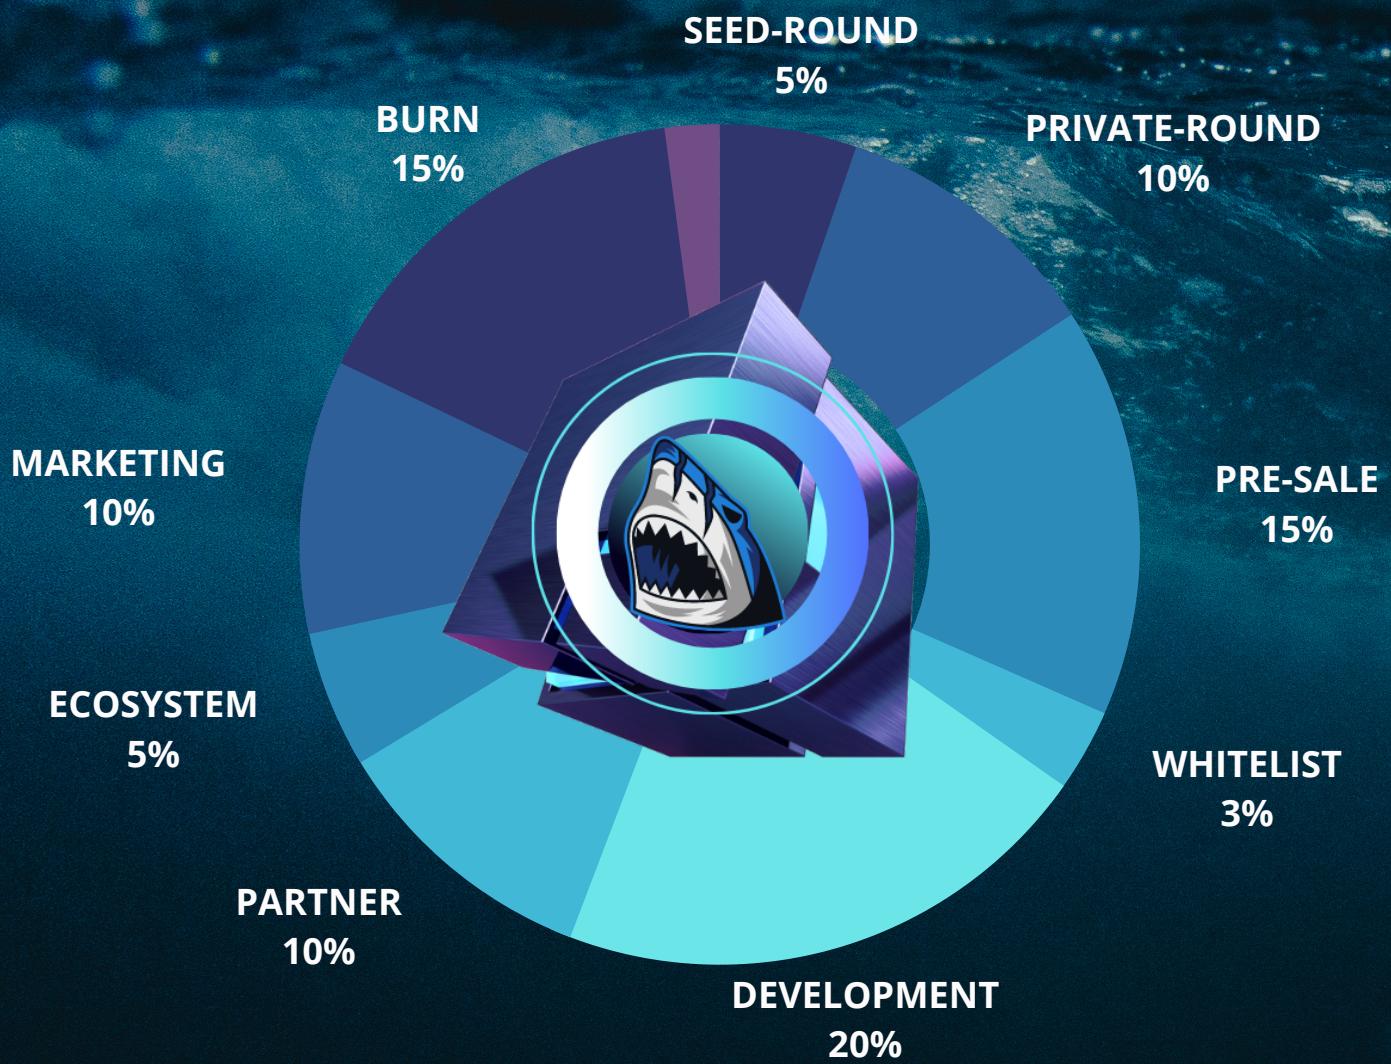

There are currently no AAA gaming titles with cinematic quality 3D special effects in an immersive open-world metaverse RPG built in DeFi, and Illuvium merges gaming and cryptocurrency in a unique synergy that holds allure for crypto enthusiasts, dedicated gamers, and the curious tech-savvy public. By having gorgeous, functional, and rare NFTs, as well as a high replay value, Illuvium will keep players interested in the \$ILV protocol longer, ensuring the stability of the underlying NFT assets and the token pool.

(There are risks associated with DeFi, particularly staking and smart contract risk, and contract configurations are being developed continuously and subject to change and sentiment expressed by the Illuvium community).

MINTING BURNING EXCHANGE

**Buy a digital asset,
own it, and hope it
appreciates in value.**

From the very beginning, the standard paradigm of most NFT games had become uninteresting, and lacking in utility.

METASHARK ZONE

INSIDE SHARKZONE, YOU WILL ENCOUNTER WILD, MYSTERIOUS, AND COMBATIVE CREATURES CALLED METASHARK.

THIS MONTH'S NEWS AND UPDATES:

Metashark makes this vital process much easier, by taking away distraction and letting players simply explore and enjoy the world.

HUNTING AT DEEP OCEAN

TO DO THIS YOU NEED A SHARK

On your journey through the many regions of this broken planet, you hunt, defeat, and capture them.

The quality of your Shark determines the chance of capture. A successful capture results in a new token representing the Metashark being minted and stored in your wallet. When you manage to capture a few of the same type, you Fuse them together, which burns the existing tokens and mints a more powerful creature.

Otherwise, combining 2 Sharks will give you a new breed of Shark. Which one is faster , stronger and earning more \$MTS.

ROADMAP

2021-2022

Q4-2021

Prepare for hunting

Deploy Tokens and start develop game platform.
(Seed-Round and Private-Sale)

Q1-2022

Faster and Stronger

Starting Pre-sale and adjust the process of distribution tokens into Metashark (MTS) community.

Q2-2022

Metashark Zone

Deploy Metashark on Metaverse world and find tester with community.
(Public-Sale and Open Beta for Metashark Zone)

Q3-2022

Discovery Ocean

Complete open game server and let our SHARK begin their hunt.
